

FLOWFEED DM3

Flowfeed DM3 is a soluble nutrient blend specifically developed for fertigating nutrients through trickle, micro-sprinkler and most other irrigation systems.

Flowfeed DM3 is totally soluble and made from the highest quality technical grade ingredients. It has been designed in Australia for Australian conditions, to supply a particular balance of major nutrients and selected trace elements.

USES:

The high potassium to nitrogen (K:N) ratio makes Flowfeed DM3 ideal for use during flower and fruit development in vegetables and fruit trees, or any time when a low nitrogen and high potassium ratio is required.
